PROFESSIONAL EXPERIENCE

Full-Stack Software Engineering Intern | [Neominds EduTech LTD](#)

July 2026 – Present

- Serving as a key engineering intern contributing to the architecture and development of the flagship Full-Stack School Management System.
- Designing and implementing real-time tracking modules for student attendance, teacher metrics, assignment submissions, and academic records.
- Building integrated online payment processing features alongside automated financial reporting and revenue analytics dashboards.
- Implementing role-based access control (RBAC) and dedicated admin interfaces for secure, institution-wide data oversight.

Full-Stack Developer | [Alkebulan Foundation](#)

Freelance Contract

- Engineered a full-stack NGO platform supporting community skill acquisition, user account registration, and course enrollment.
- Designed secure user authentication using JSON Web Tokens (JWT) and secure cookie storage for robust session safety.
- Integrated a secure online payment gateway allowing donors worldwide to contribute financial donations directly to the foundation.

Technical Mentor | [Alkebulan Foundation](#)

2025 – Present

- Teach web development fundamentals (HTML, CSS, JavaScript, React, Node.js) to aspiring software developers.
- Guide students through full-stack architecture concepts, real-world debugging strategies, and industry-standard Git collaboration workflows.

FEATURED PROJECTS

Developer Portfolio & Integrated Blog Platform

- Designed and deployed a responsive personal developer portfolio featuring a custom full-stack blogging engine.
- Configured secure admin routes for blog publishing and SEO-optimized metadata generation for social sharing previews.
- Established automated cron-job health ping services to eliminate backend cold-starts on Render and maintain optimal site performance.

CONTINUOUS LEARNING & DEVELOPMENT

Self-Taught Full-Stack Engineering Track [Independent Architecture & Practical Execution](#) 2023 – Present

Focused on modern web architecture, system design, database management, and scalable MERN stack implementations.
